

Soft Roll-Up
Tonneau Cover

PUT IT ON...

TRUXEDO®

by Shur-Co.

The automatic tension control system utilizes 2 compact stainless steel, spring loaded plungers that maintain constant tension, allowing the cover to stay tight in any weather.

TruXedo has a 1-finger EZ release latching system that releases the header to roll the cover open.

TruXedo's bows, header and side rails come in a standard black anodized finish.

TruXedo's 2 security straps adequately self-store the cover without having to remove anything.

The unique fastening system is permanently bonded to a plastic strip that slides into a track on the side rail creating continuous contact.

TruXedo has a weather seal on ALL 4 sides.

STEP 1

Release the latch on the passenger side to unlock the rear header.

STEP 2

Roll-Up cover from one side with ease. Header and bows roll-up with TruXedo® cover forming an even, compact roll.

STEP 3

Complete cover self-stores at the front of the bed with security straps. Reverse steps to close.

2 in 1 Tool Box & Tonneau
integrated to utilize both
tonneau and
tool box...

TRUXEDO Plus

Use Your Truck, Like A Truck
works on all makes & models and
works with bed liners, side rails,
